

# GET ORGANIZED!

Organize your garage, basement, office or playroom. Whether you have a large area to organize, or a small space, our Rigid-Tie connectors allow you to build a solution that works for you. You decide what width, height and length your project will be – then use our connectors to create strong, secure attachments.

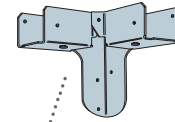

You can build shelves, workbenches, a logholder or a picnic bench – the possibilities are endless.

Our connectors are easy to install and can be finished with paint to match the decor of your home.

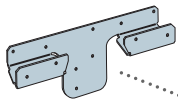

**RTA**  
**Rigid Tie™ Angle**

Makes the corner connection of two pieces of wood. Attaches to two sides of each wood member for a rigid connection.  
*See page 24.*

**RTC**  
**Rigid Tie™ Corner Connector**

Ties 2x4 vertical member through 2x horizontal member.  
*See page 25.*

**RTF22**  
**Rigid Tie™ Flat Connector**

Ties 2x4 vertical member through 2x horizontal member.  
*See page 25.*
