

DO YOU HAVE THE RIGHT NAIL FOR THE JOB?

There are many types of nails available: common box, sinker, etc. For each type, the penny weight designation (i.e. 8d or 8 penny) indicates a different diameter and length.

Nearly all of our products require common nails. So, we do not state "common" every time the nail size is given, it is understood.

8d common has a 0.131" diameter
10d common has a 0.148" diameter
16d common has a 0.162" diameter

Simpson sells the following nails:

Stainless Steel Finish:

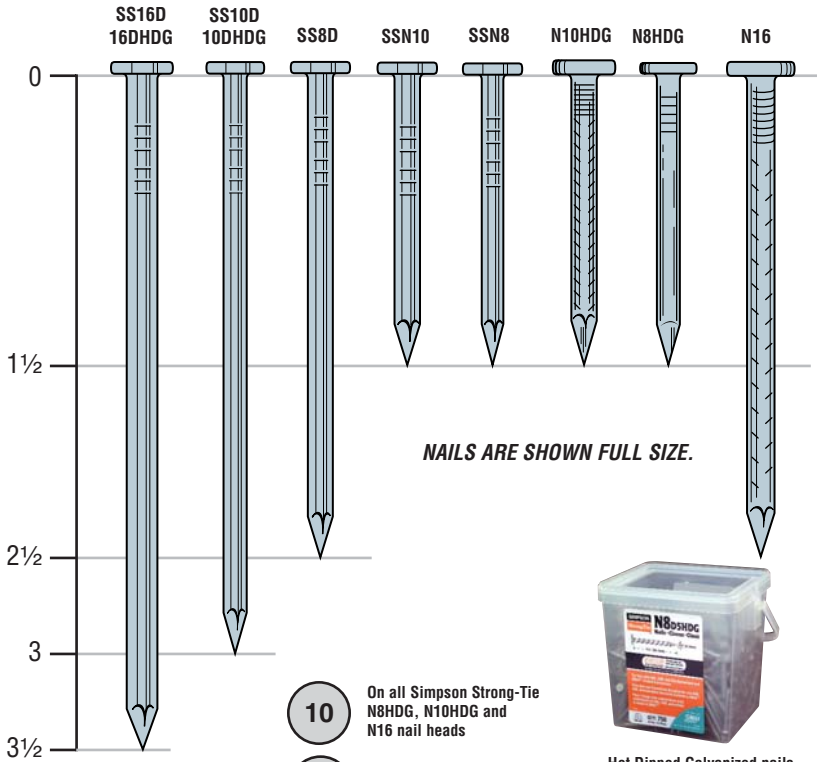

- SS16D = 16d common
- SS10D = 10d common
- SSN10 = 8d common x 1½" length
- SSN8 = 8d common x 1½" length
- SS8D = 8d common

Hot Dip Galvanized Finish:

- 16DHDG = 16d common
- 10DHDG = 10d common
- N10HDG = 10d common x 1½" length
- N8HDG = 8d common x 1½" length

Bright Finish:

- N16 = 16d common x 2½" length

NAILS ARE SHOWN FULL SIZE.

-  On all Simpson Strong-Tie N8HDG, N10HDG and N16 nail heads
-  On all Simpson Strong-Tie Stainless Steel nail heads

Hot Dipped Galvanized nails are available in 1 lb. and 5 lb. plastic tubs for easy handling.
