Composi-Lok™ Screw for Composite Decking

The new Quik Drive Composi-Lok deck screw combines ease of installation and reliability with a finished look that will compliment any deck. “Wings” on the shaft counter bore the deck board, helping to prevent fastener “spin out”, and the cap style head reduces any mushrooming material, ensuring a cleaner looking installation. Available in various colors with the Quik Guard® coating or 305 stainless steel.

See page 61 for more details.

PROPP150 Precision Placement Tool for Standing-Seam Metal Roofing

Simpson Strong-Tie introduces a new system that will change the way you look at fastening standing-seam metal roofing. The Quik Drive PROPP150 system is a revolutionary new tool featuring the patent-pending Precision Placement™ Nosepiece which enables fast, precise placement of collated screws in standing-seam panel clips. The unique shape of the nosepiece makes it easy for the operator to find the hole in the panel clip with the tip of the tool and drive the screw in the right place every time. Now you can install panels in about half the time of traditional fastening methods.

See pages 20 and 41 for more details.

316 Stainless Steel SS3DSC Series Screw

The DSC screw is available in 316 stainless steel for deck and dock applications in highly corrosive environments and where called out by local building departments. This #10 screw is available in 2 ½" and 3" lengths and features a Type 17 point as well as a # 3 square drive for easy driving.

See page 60 for more details.

Pan Head Screw for Fastening Wood and Light-Gauge Steel-to-Wood

The new PHSS Pan Head Screw is ideal for fastening wood-to-wood and light-gauge steel steel-to-wood applications. The twin lead sharp point and square drive make it easy to install while the pan head helps prevent overdriving in wood-to-wood applications such as crating.

See page 62 for more details.

Cordless DeWalt® Screwdriver Motor

Now the speed and convenience of automatic fastening is available with a cordless screwdriver motor. The DW520QD eliminates the need to find a power source and is ideal for remodeling or other low torque or low volume applications such as drywall installation. Also a good choice for roofing applications where a cord might create safety concerns.

See page 32 for more details.

NEW PRODUCTS

The Newest Solution for the Tile Contractor

The new PROCGB Combo System is the complete solution for the tile contractor. Two auto-feed screwdriving attachments are included to provide suitability for a wide variety of applications. The QDPROLDHG2 attachment is ideal for fastening cement board and fiber-cement board underlayment and backerboard and the QDPRO200SG2 attachment handles gypsum panel. Complete with a screwdriver motor and an extension that allows stand-up driving. Increase productivity and reduce installer fatigue with this complete tile contractor system.

See page 39 for more details.

5/16" Hex Head Autofeed Fastening System

The new PROHX516XL system allows you to fasten steel decking-to-steel with auto-feed speed and the convenience of stand-up driving. The system features an extended nose piece for driving in the valleys of the decking as well as 2500 rpm screwdriver motors with standard and adjustable torque.

See page 48 for more details.

A New Solution for Exposed-Fastener Metal Roofing

Now Simpson Strong-Tie combines a new system for installing hex-head metal roofing fasteners with a line of color-matched screws to provide a complete solution for the roofing contractor. In addition to auto-feed screwdriving speed, the new PROHX14 system features precise depth adjustment to ensure consistent fastener installation with less effort. The new HG collated hex head screws feature a bonded neoprene-backed washer and are available in 22 stock colors and may also be custom ordered to match the color of any roofing panel.

See pages 42 and 68 for more details.

New Fastening Systems for Truck and Trailer Manufacturing

The new PROHSD systems provide more versatility for truck and trailer bed fastening with two new systems designed specifically for the industry. The PROHSD60 system fastens screws from 45–60mm and is now available with a 2-speed Makita® screwdriver motor in addition to the QDHSD60 attachment. The new PROHSD75 fastens screws from 55–75mm and is available with a 2-speed Makita screwdriver motor in addition to the QDHSD75 attachment.

See pages 46 and 47 for more details.

One Attachment Now Handles Both 2½" and 3" Screws for Tile Roofing Applications

The new PRO300SRF system features a new attachment to drive 2½" and 3" tile roofing screws, eliminating the need for contractors to carry two attachments. The system is available with either a 2500 or 3500 rpm Makita screwdriver motor, or the attachment is available separately. Now installing roof tiles quickly and consistently, with less breakage, is easier than ever.
