

APPLICATIONS

Quik Drive® Auto-Feed Systems increase productivity while providing superior fastener performance

When it comes to choosing fasteners, the superior holding power of screws over nails is obvious, but the time-saving advantage of driving nails has always tipped the balance in their favor – until now!

Quik Drive auto-feed screw driving systems are ideal for a broad range of fastening applications because they feature quick-loading screw strips, precise countersink adjustment, and a patented auto-advance mechanism. Now you can improve the quality and durability of your work while reducing time and money spent on the job.

Quik Drive Auto-Feed Attachments Feature:

Auto-Feed Attachments

- Attach easily to extension or screwdriver motor

Durable Extension

- Reduces physical stress – Stand-up-and-drive

Adjustable Hand Grip

- 2-way positioning for stability and comfort

270° Locking Extension Coupling

- Set grip location for maximum leverage
- Accommodates left- or right-handed use

Fastener Strip Quiver Included with Systems

- Up to 500 easy-to-load screws at your fingertips!
