

What's New

172 New Standard Strong Frame™ Models

Our customers asked for more versatility and we've responded by expanding our Strong Frame ordinary moment frame product line to include 28 new opening sizes resulting in 172 new models. Now our factory-built moment frame is available in sizes up to 20' wide and 19' tall encompassing a total of 56 total opening sizes and 368 models.

Custom Strong Frame Sizes™

If one of our standard sizes of Strong Frame ordinary moment frame doesn't suit your project, have no fear – we now offer custom sizes to fit almost any project. Using our standard Strong Frame column and beam profiles we can now manufacture frames to your size specifications in clear-opening widths ranging from 6' to 20'-4" and clear-opening heights from 6' to 19'-10½". Now you can get just the right size Strong Frame moment frame for your new or retrofit project. Call your local Simpson Strong-Tie representative at (800) 999-5099 for more details on the ordering process and lead times.

New Strong Frame™ Ordinary Moment Frame Selector Software

To help Designers with specification, we've created the new Strong Frame Selector software. The user inputs desired loads as well as the height, width and available space for columns and the program suggests a list of available frames ranked according to cost. It will also suggest anchorage-solution options. To download a FREE copy visit www.strongtie.com/strongframe.

Changes To This Catalog

In order to make this catalog a more effective design tool, we have re-formatted the layout to better work with the design process. All of the design concepts and details are summarized, and are color coded to match the section in the catalog where those items are explained in detail. We have also included alternate loading detail sheets (also available on www.strongtie.com/strongframe) so Designers can input loads for needs not addressed in the catalog and then fax them to Simpson Strong-Tie for frame design assistance. We also have enhanced design example pages to make it easier to design and select the most economical frame to fit your needs.

Visit www.strongtie.com for updates and new information on our Strong Frame moment frame product line.
