

# PRO250G2 SCREW DRIVING SYSTEMS FOR SUBFLOOR, WALLPLATES, DECKS

33% of floor screws are toenailed at seams. Non-skid nibs and nose contour are engineered to deliver accurate toenailing with consistent countersink

Adjust the handle for your driving comfort

## PRO250G2 AUTOFEED SYSTEM with new features to make your work easier

- Fast, easy fastening with tough reliability
- Non-skid nibs and nose contour deliver consistent countersink when toenailing
- Self locking depth control with expanded range for countersink in high density OSB
- QuikLock coupling for easy breakdown and assembly can't slip or loosen
- Built-in bit wrench is always there when you need it
- Adjustable handle for improved ergonomics
- Limited Lifetime Warranty

NEW

Shown here with Quik Drive® Screwgun by Porter Cable

### SYSTEM INCLUDES

- QDPRO250G2 AutoFeed Driving Unit - Drives 1½" to 2½" Screws
- Stand-up Extension
- Quiver • Hard Plastic Tool Case
- Choice of DeWalt, Makita, or Porter Cable Screwgun

complete system with:  
DeWalt 2500rpm screwgun  
product code PRO250G2D25K

complete system with:  
Makita 2500rpm screwgun  
product code PRO250G2M25K  
Makita 3500rpm screwgun  
product code PRO250G2M35K  
Makita 4500rpm screwgun  
product code PRO250G2M45K

complete system with  
Porter Cable 2500rpm screwgun  
product code PRO250G2P25K

## SUBFLOOR, WALLPLATE AND DECK SCREWS available for the PRO250G2

PRO250 drives 1½" - 2½" screws - available lengths for use in other Quik Drive systems shown in grey

**WSNTL SERIES** #8 wood screw, twin thread, sharp point, countersink nibs, yellow zinc coating, #3 sq. drive

- ICBO ER - 5053 - 2", 2½" lengths
- Ideal for high density OSB
- 2" length is The Approved Fastener for

**PPSD11516S** #8 wood to steel screw, fine thread, #2 drill point, flat head, yellow zinc coating for interior use only, #3 sq. drive

- Designed to prevent floor material (up to 3/4") from "riding-up" the threads

**WSNTLG SERIES** #9 deck/dock screw, twin thread, sharp point, countersink nibs, N2000® mechanical galvanized, #3 sq. drive

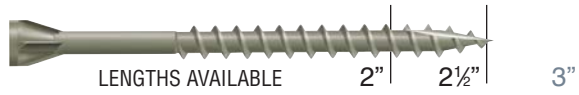

- ICBO ER - 5053 - 2", 2½" lengths

**SS3DCS SERIES** #10 stainless deck/dock screw, coarse thread, type 17 point, 305 stainless, #3 sq. drive

- \*High corrosion resistance - recommended for pressure treated lumber
- Type 17 point for easy, straight drive

**DTHG SERIES** #8 trim head deck screw, coarse thread, type 17 point, countersink nibs, TufCote™ corrosion protection, #2 sq. drive

- Type 17 point for easy, straight drive
- Trim head for neat appearance

**DCTE SERIES** multi-diameter composite lumber screw, Xtreme-Coat™ corrosion protection, #2 sq. drive

- Eliminates "mushrooming" in composite deck lumber
- Available in 3 colors - tan, grey, red
- The only source for collated TrapEase® screws

**SSDTH SERIES** #7 stainless deck/dock screw, sawtooth thread, sharp point, 305 stainless, #2 sq. drive

- \*High corrosion resistance - recommended for pressure treated lumber
- Trim head for neat appearance
- Sawtooth threads reduce friction for easier driving

Quik Drive's new, patented *Banana Strips* curve away from the material surface making it easier to drive from any angle, toenail from any angle and help protect fragile surfaces.

\*We recommend stainless steel screws for use in most pressure treated lumber including ACQ-C, ACQ-D, ACQ-D Carbonate, CBA-A, and CA-B. See [www.strongtie.com/info](http://www.strongtie.com/info) for additional information.

Stainless steel screws are softer by nature and have less torquing strength than many other types. Due to variations in materials and installation practices, Quik Drive® assumes no liability for breakage or damage due to breakage during or after installation.

Instruction Manual, Attachment Schematic, and Warranty Information available on our web site.
