

# QDA158NS Attachment For Fiberglass-Backed Gypsum Sheathing

Increase productivity and reliability with the Quik Drive® QDA158NS

Designed and field tested by end users, the QDA158NS is ideal for fastening fiberglass-backed gypsum sheathing. This lightweight attachment can turn a screwdriver motor into an auto-feed system by snapping onto select tools. While other fastening methods may allow sheathing to shake loose in transit from the panel yard to the jobsite, the QDA158NS uses screws for a vibration-resistant hold. The countersink adjustment on the QDA158NS allows for consistent driving with precise depth control.

## FEATURES:

- Non-skid nose allows for accurate screw placement with less waste
- Cost-effective solution for both on-site and panel yard applications
- Metal nose molded into the tip prevents wear when fastening abrasive materials
- Screws offer improved penetration in double thickness sheathing or welds
- Depth adjustment eliminates over penetration of sheathing
- Slim profile allows for driving in corners
- Color-coded adaptors (included) snap onto DeWalt®, Makita® or Milwaukee® screwdriver motors
- Uses 1"-1 5/8" sharp point and self-drilling screws
- 90 day warranty
