

**NEW!**

# Quik Drive® Decking Nose Clip

## CONSISTENT SCREW PLACEMENT FOR A QUALITY FINISH

Fasten deck boards quickly without measuring, bending or kneeling by using the Quik Drive® decking nose clip. The decking nose clip fits onto the end of any Quik Drive auto-feed screw driving attachment with a removable standard nose clip. It serves as a guide for the proper placement of screws when attaching deck boards to joists to ensure precise and uniform fastening in the center of the joist every time.

## FEATURES

- Installs easily onto any Quik Drive attachment with a removable nose clip
- Centers each screw on a 2x joist with consistent spacing from the edge of the decking, ensuring fasteners are uniformly spaced in straight rows
- Allows precise fastener placement from a standing position when used with the extension – no bending or kneeling necessary
- Positions screw 1" from edge of deck board.

QDDECKCLIP-RC

The decking nose clip is included with the Quik Drive PRO300S System, and can also be purchased separately. It fits any Quik Drive attachment with a removable nose clip (the Quik Drive PRO200S, PRO250S and PRO300S).
