

INTRODUCING:

Simpson's Steel Strong-Wall®

**NOW CODE LISTED
ICC-ES ESR-1679**

- ◆ **STRONGER WALL**
An engineered composite of steel and wood, this new addition to the Strong-Wall line features allowable loads that are between 2 and 3 times higher than the original Strong-Wall.
- ◆ **UNIQUE DESIGN**
The unique steel design resists distortion of the center section and results in sustained vertical load capacity.
- ◆ **EASIEST TO INSTALL**
Feedback from contractors resulted in the building industry's easiest to install shearwall, including pre-attached wood studs, two easily accessible anchor bolts, fewer top-of-wall screws and numerous pre-drilled holes.
- ◆ **NARROW GARAGE WALL SOLUTION**
With walls as narrow as 12" Simpson Strong-Tie® has solved the problem of wider code required walls at garage fronts.
