# Our boxes are changing, but the product in them isn't.

## Merging our strengths in the fastener industry

Simpson Strong-Tie and Swan Secure are two companies known for innovative, high-quality products and a focus on the customer. Now that Swan Secure is part of the Simpson Strong-Tie family we are excited to combine our strengths to expand our offering of high-quality specialized fasteners. As we integrate the companies, we realize that it is vital to stay focused on the customer in order to provide the same first-class service both Simpson Strong-Tie and Swan Secure are known for.

## One good brand deserves another

As we begin to transition away from the Swan Secure™ brand, rest assured that our new boxes contain the same high-quality corrosion-resistant fasteners you've relied on for years. As a company that is committed to structural safety, Simpson Strong-Tie has earned a reputation for refusing to compromise when it comes to quality or performance.
